

HSE United Kingdom Congress 2022

Part of HSE Global Series

Programme - All Times in BST - British Summer Time

Tuesday 5th July 2022 EVENT STARTS	
09:00 - 09:30	Welcome to the Congress & Ice Breaker
09:30 - 10:30	<p>Panel 1</p> <p>Topic: Complacency and Fatal Injuries-the counter-intuitive nature of SIF's</p> <p>Hosted by: Larry Wilson, Founder, SafeStart</p> <p>Panellists:</p> <ul style="list-style-type: none"> • Steff Williams, Director of Safety, Sonoco Europe • Christopher Smith, Global Head of HSE, Hitachi Energy <p>Overview:</p> <p>In this panel session we will investigate the Complacency and Fatal Injuries-the counter-intuitive nature of SIF's what the leading businesses in the UK are currently doing and what the past has taught us.</p>
10:30 - 11:20	<p>Roundtable 1</p> <p>Topic: Do hard hats give sufficient protection?</p> <p>Hosted by: Chris Tidy, Product/Training Specialist and Olof Rylander, Senior Business Development ManagerMIPS - Safety For Helmets</p> <p>Overview: Mips understands that head protection probably has one of the highest wearer compliance rates out of all PPE products. However, despite high compliance and usage rates, there still remains some key unmet needs, offering scope for improvement. Whilst compliance is high, the knowledge of the correct products by application is still low, and without adequate training and education, we risk making key specification adjustments. This is evidenced through continuous research which highlights that head protection is at risk of commoditising. The phrase "a hard hat is just a hard hat" is used way too often, demonstrating that companies often default to the lowest cost solution, so long as it meets the standard not understanding that the standard is the minimum level of protection.</p> <p>This roundtable event has been set up for participants to explore and understand the different levels of protection that hard hats can give the wearer and to further their knowledge of head protection standards. The event also explores head injuries and their possible mitigation by looking at some real risks that's wearers of head protection face on a daily basis. This event hopes to contribute to a world of safer helmets and a better understanding of what protection means.</p>

	<p>Key Take Away's</p> <p>1: A better understanding of head protection 2: A better understanding of additional helmet technologies 3: That not all head protection is equal</p>
10:30 - 11:20	<p>Roundtable 2</p> <p>Topic: Creating a Safe Driving Culture Hosted by: Andy Phillips, Global Managing Partner and Richard Shaw Global Sales Director Applied Driving Techniques with Jen Yaxley, Jacobs</p> <p>Overview: Driving at work is the greatest risk your people undertake every day, but it's also one of the most commonly overlooked risks. While most organizations have an established safety culture it often lacks direction when it comes to driving. This roundtable discussion will provide experienced insight so you can confidently implement a safe driving culture fit for your business. Critical to the success of any safety culture is obtaining stakeholder buy-in at all levels. From drivers to CEO, the session will provide strategies to help you secure buy-in from the ground up.</p> <p>Your newly defined culture must be adopted globally, whether that's across lines of business or international regions. The session reviews the benefits of a global minimum standard and how to identify where it's best to accept flexibility. Now you have implemented your driver safety culture, how do you maintain it and ensure it remains fit for purpose? Travel is rapidly evolving with Mobility as a Service becoming increasingly mainstream. We'll look at how continual development can secure your business sustained results.</p> <p>Hosted in partnership, the roundtable includes a live customer experience of designing, implementing, and improving their driver safety culture, and the impact this continues to have on their business.</p> <p>Key take-aways:</p> <ol style="list-style-type: none"> 1. How to develop a driver safety culture 2. How to secure stakeholder buy-in 3. How to obtain consistency while accepting the need for flexibility
11:20 - 11:40	<p>Meetings & Networking Break</p> <p>Refreshments provided in the Exhibition Room</p>
11:40 - 12:10	<p>Workshop</p> <p>Topic: Life And Learnings From In-House Safety Teams Hosted by: Zoe Davies, Head of Safety, BBC and Owen Yorath, Group Head of Health & Safety, SKY</p> <p>Overview:</p> <p>A knowledge-share from two leaders of in-house safety teams at BBC and Sky. A deep dive into the operating models, plus a look at the mission and purpose on how these teams drive competence and capability in the 1st line. The sessions will offer a chance to ask questions and explore the</p>

	<p>challenges faced with being an in-house safety team.</p> <p>Key take-ways</p> <ul style="list-style-type: none"> • Shared learnings from different operating models and approaches to improving safety in the 1st line • Tips on developing a vision that the business and safety team can understand • Understanding of the full value of an effective 2nd line safety function.
12:10 - 12:40	<p>Interactive Workshop</p> <p>Topic: Take Corporate Culture from Zero to Hero in 30 minutes</p> <p>Hosted by: DEKRA</p> <p>Overview:</p> <p>This interactive session consists of games and surprises! At DEKRA we find unconventional learning methods can have a real lasting memorable impact. Come to get energised, have fun and learn the visceral, human meaning of culture.</p> <p>Key take-ways</p> <ul style="list-style-type: none"> • The impact small actions can have on culture • How mob mentality affect culture • How supporting your colleagues affects culture
12:40 - 13:00	<p>Meetings & Networking Break</p> <p>Refreshments provided in the Exhibition Room</p>
13:00 - 13:40	<p>Lunch</p> <p>Lunch will now be served in the main workshop room</p>
13:40 - 14:10	<p>Workshop</p> <p>Topic: Does a health and safety management system standard really improve performance?</p> <p>Hosted by: Kate Field, Global Head, Health, Safety & Wellbeing, BSI Group</p> <p>Overview:</p> <p>Millions of companies around the world have adopted management system standards believing that following a structured framework of best practice will yield benefits. These standards set requirements on operational processes and procedures, and (to a greater or lesser extent) the governance frameworks needed to make it work, both of which are important in enhancing an organizations overall resilience. Importantly</p>

	<p>the standards also require ongoing improvement. Organizations considering adopting any management system standard have a clear interest in knowing whether doing so would actually lead them to improve their performance.</p> <p>Studies on management system maturity, and individual organizational measures and feedback would certainly suggest that implementing management systems has a positive effect – but independent, empirical evidence has not been available...until now. New research by the Harvard Business School examines this question in the context of BSI's OHSAS 18001 Occupational Health and Safety Management System standard (now ISO 45001). The research analysed proprietary certification data from some of the world's largest certification companies and injury microdata from the U.S. Bureau of Labor Statistics. It is the first study to directly examine the effects of the OHSAS 18001 standard on establishment-level health and safety performance using injury and illness data.</p> <p>During this session, you'll find out more about the research and discover the answer to the following questions:</p> <ul style="list-style-type: none"> · Does implementation of OHSAS 18001 (ISO 45001) enhance performance? · Does health and safety performance plateau over time? · What impact does certification have on performance?
14:10 - 14:40	<p>Workshop Topic: A look into Sustainability using the newly published UK future green skill report and proposed future plans etc Hosted by: Karren White, Vice President – Global Health, Safety & Environment, TT Electronics Overview:</p>
14:40 - 15:00	<p>Meetings & Networking Break Refreshments provided in the Exhibition Room</p>
15:00 - 15:30	<p>Workshop Topic: Managing Risk is the Best Strategy for HSE Performance Hosted by: Chris McCann , Senior Sales Support Specialist, Wolters Kluwer Enablon Overview:</p>

	<p>A key organisational goal is to try and achieve "Zero Harm" within the organisation and achieve industry leading safety performance (LTIFR). Often these goals have hard targets set against them such as zero injuries or events with monetary bonuses attached to them, which in turn leads to a lack of focus on HSE reporting and continuous improvement. Enablon will share best practices and insights into the benefits of focusing on managing risk while identifying and rewarding those who do so as a strategy all while increasing HSE performance and gaining a more engaged workforce.</p>
15:30 - 16:00	<p>Workshop Topic: Risk Leadership - What Matters? Hosted by: Ruth Denyer, Co-President IIRSM Overview: Looking at the key areas that underpin effective risk leadership and their impact on all the elements that make up management systems.</p> <p>There are key themes that come up again and again which are critical to good risk leadership, this session will look at these and provide context as to why they are so important. By using these as a lens through which we consider how we effectively support health and safety risk management we can really think about the impact of our work, our teams and the tools we develop and deploy within our organisations.</p> <p>Key take-ways</p> <ul style="list-style-type: none"> • Understand what underpins good risk leadership. • Consider how these can increase the impact of health and safety activity. • Consider how these can support health and safety becoming part of a wider risk management conversation.
16:00 - 16:20	<p>Meetings & Networking Break Refreshments provided in the Exhibition Room</p>
16:20 - 17:05	<p>Keynote with Book Signing Topic: Defenceless Moments Hosted by: Larry Wilson, Founder, SafeStart</p>
17:05 - 18:05	<p>Break Before The Evening The Congress will now pause giving everyone a chance to return to the rooms before the evening starts</p>

18:05 - 19:00	Pre-Dinner Drinks Reception
19:00 - 21:00	Outdoor BBQ On The Terrace Overlooking The Lake With Drinks & Entertainment From One Of The UK's Leading Magicians
21:00	After Dinner

END OF DAY 1

Wednesday 6th July 2022

08:45 - 09:00	Welcome to the Congress & Ice Breaker
09:00 - 09:45	<p>Panel 2 Topic: Nobody Had A Plan & Yet We Survived Hosted by: Sam Greensitt, Global Head of Partnerships, Acre Frameworks Panellists:</p> <ul style="list-style-type: none"> • Stephen Gregory, HSS Director, Merlin Entertainments • James Pomeroy, Director I Global Health and Safety Leader, ARUP • Karen White, Vice President – Global Health, Safety & Environment, TT Electronics <p>Overview: Things we need to learn moving forward . Looking back on the past two years, what learnings we can take from it. Nobody had a plan for a global pandemic and yet with contestant updates and a flexible attitude to an ever-changing situation we came through the other side. What have we learnt, what will we take into the future with us and what have we learnt about not always needing to have a full plan / programme.</p>
09:45 - 10:35	<p>Roundtable 3 Topic: Your Culture is your Brand Hosted by: DEKRA Overview: Your brand is not just a combination of external factors like logos, colour schemes or slogans. It is instead bound up with customer experience, which in turn is a function of your company's culture. That's why cultivating a positive culture—with every member of your organisation contributing to it—is essential to establishing a successful brand. Your organisational culture is the only thing that can never truly be copied or imitated, embrace that individuality! It's not a policy or process; it's not a meaningful quote on a notice board or intranet site; it's the heartbeat of your company. Striving to achieve beyond mere safety compliance is a decision you make every day will propel your company toward becoming</p>

	<p>a leader and partner of choice. Individual actions and behaviours create safety results, embracing this truth will parachute your organisation's brand, culture, and safety performance from a helicopter view right down to eye level where we all see each other and interact. It will add value to your company and distinguish you from the competition. Are you helping to lead your organisation on this journey?</p> <p>Key take-aways:</p> <ul style="list-style-type: none"> • What your company brand is • How organisational and safety culture influence your brand • Where you are on the journey of your culture becoming your brand
09:45 - 10:35	<p>Roundtable 4 Hosted by: Acre Frameworks Overview:</p>
10:35 - 10:50	<p>Meetings & Networking Break Refreshments provided in the Exhibition Room</p>
10:50 - 11:20	<p>Workshop Topic: An exploration of soft skills for the future <i>An interactive session looking at the changing landscape of soft skills</i> Hosted by: Stephen Gregory, HSS Director, Merlin Entertainments & Robert Jukes, HSEQ Manager, Northwood Tissue (Lancaster) Ltd Overview: The session will explore the topic of soft skills in the workplace inviting audience participation to provide an interactive experience. It will explore what soft skills are and their relative importance to technical skills. It will also explore how the context for soft skills changes over time, including some reflection on the past, consideration of the present and looking forwards to the future. Key take-ways</p> <ul style="list-style-type: none"> • What soft skills are • They've always been around but the context and requirements change • Consider the present, look to the future (or be left behind)
11:20 - 11:50	<p>Workshop Topic: Assisted Reality for HSE: Where Innovation Meets Safety Hosted by: Derrick Sawyer, Regional Director at RealWear Overview:</p>

	<p>This workshop will introduce you to Assisted Reality (aR) technology, covering what it is, how it compares to Augmented Reality, and its significance to health and safety. Exploring aR's benefits, you will learn how RealWear's wearable solutions enable organisations to increase productivity, reduce costs and move towards digital transformation goals – all while viewing health and safety as a top priority, not a “bolt-on”.</p> <p>Discover how intrinsic safety is to the RealWear Assisted Reality devices, both in their physical design and build, as well as key use cases such as digital workflow, remote expert and IoT data visualisation. Including a live, interactive demonstration, you will see first-hand how this aR solution has helped other leading organisations to increase their safety compliance by up to 70%, reduce inspection time by up to 90%, while also seeing up to 33% in efficiency gains.</p> <p>Key take-ways</p> <ul style="list-style-type: none"> • Understand exactly what Assisted Reality is and its benefits • Learn how RealWear brings together safety and innovation • Find out how you could improve safety while also increasing productivity and reducing costs
11:50 - 12:05	<p>Meetings & Networking Break Refreshments provided in the Exhibition Room</p>
12:05 - 12:35	<p>Workshop Topic: Digital vs people-powered solutions: Why people are at the heart of any successful digital transformation programme more than ever before. Hosted by: Stephanie Haines, Benchmark ESG Gensuite Overview: The last two years of operating under the pressures of the pandemic have accelerated the 'great technology grab' to help us connect from increasingly remote environments. This session will explore our observations on this trend from a software provider's point of view, and discuss the challenges for the intersect between people and technology.</p>
12:35 - 12:55	<p>Interactive Breakout Session Hosted by: Elliot Cunnington</p>
12:55 - 13:25	<p>Workshop Topic: How to harmonize internal EHS practices thanks to digitalisation?</p>

	<p>Hosted by: Bruno Bory, Export and Multinational Manager and Carine Tribondeau, Solution Expert, BlueKanGo</p> <p>Overview: Beyond a certain size of company, standardizing HSE practices becomes complex, especially in multi-site, multi-subsidiary and multicultural contexts, with decision-making processes that are often disparate.</p> <p>Many HSE departments share the objective of simplifying or at least standardizing their processes in order to be as efficient as possible. Thereby, they can totally rely on a major ally: digital technology.</p> <p>A digital transformation process is both organisationally and economically significant, providing that the change is supervised.</p> <p>This is what we will show you through the BlueKanGo platform.</p>
13:25 - 13:35	<p>Final Networking Break Break while the main room is set for Lunch</p>
13:35 - 14:20	<p>Lunch Panel 3 Topic: Modernising & The Future of Processes & Documentation Hosted by: Sam Greensitt, Head of Global Partnerships Panellists:</p> <ul style="list-style-type: none"> • Zoe Davies, Head of Safety, The BBC • Robert Jukes, QHSE Manager, Northwood • Julie Westcott, EHS Director, Jeld-wen • Tom Watling, Head of Health and Safety and Facilities, Formula 1® <p>Overview: Is it time to re-brand the risk assessment? What is the future of our processes and documentation? With the rise of digitalisation is it time for an update.</p> <p>In this panel discussion the panellist along with the audience will discuss and share ideas on the future, what needs to be done and how we can learn from people on the front line who have to practise the theory we create everyday</p> <p><i>Lunch will be served over the panel discussion</i></p>
14:20 - 14:35	<p>Lunch After the panel finishes lunch will continue for a final 15 minutes</p>
14:35 - 14:45	<p>Closing Remarks Close of the Congress</p>

EVENT CLOSES
